Programme Overview

6th Monts Training : In 6th month IT training program is designed to equip participants with a comprehensive skill set covering foundational concepts, core IT skills, specialized technologies, and practical application. The program begins with an introduction to IT, computer hardware, networking, and cybersecurity basics. It then progresses to core IT skills, including programming, database management, web development, and system administration. The third phase delves into specialized IT skills, focusing on cloud computing, DevOps practices, and project management.

Internship : Internships play a crucial role in bridging the gap between academic learning and real-world application, providing students and recent graduates with practical experience and exposure to the professional landscape. A well-structured internship program typically involves a defined duration during which interns work on specific projects or tasks under the guidance of experienced professionals. Internships offer valuable opportunities to apply theoretical knowledge in a practical setting, develop technical and soft skills, and build a professional network.

Job Guaranteed : Increasing employability involves a multifaceted approach. Acquire relevant skills through education and certifications, gain practical experience via internships, and build a robust professionals network. Craft a tailored resume, maintain a strong online presence, and utilize diverse job search strategies. Demonstrate flexibility, commitment to continuous learning, and prepare thoroughly for interviews. These proactive steps significantly enhance your competitiveness in the job market.

Types of Career Tracks (Industry oriented Training)

List of Career Tracks (100% Job Guarantee)

Full Stack Development

Full-stack development encompasses the end-to-end process of creating web applications, involving both the front-end(client-side) and back-end(server side) components. Full-stack developers are proficient in technologies such as HTML, CSS and JavaScript for building responsive user interfaces, as well as server-side languages like PHP, Node.js or Python for handling the application's logic and database interactions. Explore the Full Spectrum of Development Excellence.

Mobile Application Development

Unlocking Innovation on every swipe. Mobile application development involves the creation of software applications specifically designed to run on mobile devices such as smartphones and tablets. Developers utilize programming languages like Java or Kotlin for Android and Swift or Objective-C for iOS to build native apps, while cross-platforms frameworks like React Native or Flutter enable the development of applications that can run on multiple platforms.

More Details : http://positivequadrant.in/Home/training_details/2

AWS Cloud Developer

AWS Cloud Developer is a skilled professional responsible for designing, developing, and deploying scalable and secure applications on the Amazon Web Services (AWS) cloud platform. AWS Cloud Developers work collaboratively with cross-functional teams, ensuring seamless integration of applications, optimizing performance, and maintaining a strong focus on security best practices.

More Details : http://positivequadrant.in/Home/training_details/23

AWS Data Engineering

An AWS Data Engineer is a proficient specialist responsible for designing and implementing scalable, efficient, and secure data solutions on the Amazon Web Services (AWS) cloud platform. They possess expertise in data architecture, ETL (Extract, Transform, Load) processes, and data integration, utilizing AWS services such as Amazon S3, AWS Glue, Amazon Redshift, and others.

More Details : http://positivequadrant.in/Home/training_details/66

Azure Data Engineering

Azure Data Engineer is a proficient professional dedicated to designing and implementing scalable and efficient data solutions on the Microsoft Azure cloud platform. With expertise in data architecture, ETL (Extract, Transform, Load) process, and data integration, they leverage Azure services such as Azure Data Factory, Azure Databricks, and Azure Synapse Analytics to develop end-to-end data pipelines.

More Details : http://positivequadrant.in/Home/training_details/63

Azure Developer Associate

An Azure Cloud Developer is a skilled professional specializing in the design, development, and deployment of scalable and secure applications on the Microsoft Azure cloud platform. Leveraging their expertise in cloud architecture, serverless computing, and various Azure services, they create robust solutions that meet business needs. Azure Cloud Developers collaborate with cross-functional teams to integrate applications seamlessly, optimize performance, and adhere to security best practices.

More Details : http://positivequadrant.in/Home/training_details/67

MEAN STACK

The MEAN (MongoDB, Express.js, Angular, and Node.js) stack developer is a versatile professional adept at building full-stack web applications. They utilize MongoDB as the NoSQL database for flexible data storage, Express.js for server-side application development, Angular for dynamic and responsive front-end interfaces, and Node.js for server-side JavaScript execution.

More Details : http://positivequadrant.in/Home/training_details/54

MERN STACK

A MERN (MongoDB, Express.js, React, and Node.js) stack developer is a proficient full-stack engineer specialized in creating dynamic and feature-rich web applications. They employ MongoDB for flexible and scalable data storage, Express.js for server-side development, React for building interactive and responsive user interfaces, and Node.js for server-side JavaScript execution.

More Details : http://positivequadrant.in/Home/training_details/55

Hybrid App Development

Hybrid App Developers specialize in creating applications that combine elements of both native and web applications. They leverage technologies like React Native or Flutter to build cross-platform apps that can run on multiple operating systems, such as iOS and Android, while utilizing web technologies like HTML, CSS, and JavaScript.

10g
ORACLE
DATABASE

Oracle 10g Administration

Unlocking Innovation on every swipe. An Oracle 10g Database Administrator (DBA) is a skilled professional responsible for managing and maintain Oracle Database 10g environments. They possess expertise in database installation, configuration, performance tuning, backup and recovery, and security administration. Oracle 10g DBAs ensure the reliability, scalability, and security of database systems, implementing best practices for optimal performance and troubleshooting issues as they arise.

More Details : http://positivequadrant.in/Home/training_details/52

UI / UX

A UI/UX (User Interface/User Experience) Designer is a creative professional focused on enhancing the overall usability and aesthetic appeal of digital products. They meticulously design user interfaces that optimize the user journey, ensuring intuitive navigation and a visually engaging experience. By incorporating user-centric design principles, usability testing, and feedback analysis, UI/UX Designers strive to create seamless and delightful interactions, considering both the visual and interactive aspects of the interface to deliver a product that aligns with user needs and business goals.

Certification Preparation Courses

Provide courses that prepare students for industry-recognized certifications such as CompTIA, Cisco, Microsoft, and others.

Workshops and Seminars

Conduct workshops and seminars on emerging technologies, trends, and industry best practices to keep students updated on the latest developments in IT.

Social Impact Projects

Imagine making a social impact while growing as a UI/UX designer. With our SIP you get to help top nonprofits/NGOs in India with website and app design - you get to do just that!

**There are 10
million jobs
in IT Industry!**

Soft Skills Trainings

Include soft skills training in communication, teamwork, and leadership to complement technical skills.

Hackathons and Coding Competitions

Organize coding competitions and hackathons to foster creativity, problem-solving skills, and teamwork among students.

Project-Based Learning

Implement project-based learning approaches to give students hands-on experience in developing IT solutions.

Industry Collaboration

- Establish partnerships with IT companies to provide insights into industry needs and trends.
- Arrange guest lectures by industry professionals to share real-world experiences.

Cloud Computing and DevOps Training

Offer training in cloud computing platforms (such as AWS, Azure, or Google Cloud) and DevOps practices to prepare students for modern IT environments.

Continuous Learning Programs

Establish a framework for continuous learning, allowing students and professionals to update their skills regularly.

Mobile App Development Courses

Provide courses on mobile app development for popular platforms like Android and iOS.

Data Science and Analytics Training

Include courses on data science, machine learning, and analytics to prepare students for the growing demand in these fields.

Mock Up Interview

- The process closely mimics a real job interviews, allowing individuals to practice and refine their responses.
- Interviewers may cover various topics, including the participant's background, skills, experiences, and situational scenarios.
- Mock interviews help improve verbal and non-verbal communication, including articulation, body language, and overall presentation.

Invigilator Services

Invigilator services encompass a diverse range of responsibilities, including project evaluation, project viva evaluation, question paper building, and the facilitation of faculty and student development programs (FDP & SDP). In addition to overseeing traditional examinations, invigilators may be involved in constructing exam papers, conducting mock interviews, and ensuring the smooth execution of assessment processes. Invigilators play a vital role in upholding the standards of examinations and enhancing the learning experience for both faculty and students.

Invigilator Services

Project Evaluation

Project evaluation is a systematic and comprehensive process used to assess the design, implementation, and outcomes of a project.

SDP - Student Development Programme

A SDP is a structured initiative implemented by educational institutions to foster the holistic growth and well-rounded development of students

Question Paper Building

Question paper building is a crucial aspect of the educational assessment process, involving the creation of a set of questions that effectively evaluate a student's understanding of a particular subject or topic.

FDP - Faculty Development Programme

A FDP is a structured initiative designed to enhance the professional capabilities and effectiveness of faculty members.

Project Viva Evaluation

The evaluation involves a structured conversation between the student and the panel covering various aspects such as project's objectives, methodology, findings, and the student's understanding of the subject matter.

Conducting Mocks Interview

Conducting mock interviews is a valuable practice for helping individuals prepare for real job

Doubt Support

We have developed a very scalable solution using which we are able to solve 7000+ doubts every single day with the help of our 2000+ TAs on the platform itself with an average rating of 4.8 out of 5.

Live Projects

Build Industry standard end-to-end Mini, Major and Capstone projects.

Get an Industry

Recognised Certificate

Get awarded with an industry-recognised certificate as you complete your Boot camp.

Be a part of the learning community:

Performance tracking team and Slack groups to connect with your peers.

Live Mentorship:

Interact live 1:1 with industry experts and schedule mock interviews with mentors.
